3 Abstract

4 This is the text of the abstract. Abstracts should always be written after you've finished everything
5 else.

6 Introduction

7 For time immemorial, humankind has wondered: If I have two apples, and someone gives me another
8 two apples, how many apples do I have? Some people did this (Darwin, 1859). Other people did
9 that (Wallace, 1869).

10 The major problems with those approaches are that they forgot Poland. We seek to remedy this
11 by applying a Bayesian Approach.

12 **Methods**

13 We constructed the following mathematical model (equation 1) to better understand the concept:

$$Y = 2a + 2a \tag{1}$$

14 Where a represents an apple.

15 **Results**

16 We found that if you have two apples, and someone gives you another two apples, you have four
17 apples.

18 **Discussion**

19 Boy those results sure are neat. Now, the pressing question becomes: How do you like them apples?
20 Further research is needed.

21 **Acknowledgements**

22 We wish to thank all of the little people.

23 **Funding**

24 This study was funded by grant number 8-6753-09 from The Super-Rich Uncle Foundation to First
25 Author.

26 **Author Contributions**

27 Conceived and designed the experiments: Collected the data: Conducted the analyses: Wrote the
28 first draft: Edited the manuscript:

29 **Ethics Statement**

30 The authors declare big, honkin' conflicts of interest.

31 **Data Availability**

32 The data and code used to generate our results can be found at the following url:
